Rebranding Project

Brand Workshop

Embarking On A Journey Together

01

Intro
30 min.

02

Brand Workshop
120 min.

03

Key Insights/Brief Summary
One week after the workshop

04

Rebranding Concepts
2-3 weeks after the workshop

A surprising connection.

First life, then spaces, then buildings—the other way around never works.

Jan Gehl

Danish architect and
urban design consultant

Start with people.

Observation 1

The buildings of the future already exist

On a quest for sustainability, it is often ineffective to construct new buildings, whether incorporating the latest tech or not. The key approach is to harness the existing technology during the revamping of current infrastructure.

The conventional brick-and-mortar sector provides a solution: **Renovate, Retrofit, Reuse.**

Thanks to the latest technology, we could introduce an additional layer – **Reimagine.**

We are creating a operating system for operators and visitors, empowering them to **extract** – and **create** – the value from their premises.

Observation 2

Technology-driven expectations

AI is everywhere, but it is not the only driver of technological innovation these days.

As the cost and capabilities required for both adapting new technologies continue to decrease, people's expectations for digital services are indirectly grow. Following the widespread growth of ecommerce and smartphones into our daily lives, we have come to expect a similar level of experience using cars, financial and public services, and of course buildings.

Bringing buildings to their next evolutionary phase is not just about gaining a market advantage, it is a necessity.

Observation 3

Business to business gets personal

Selling software hasn't always been fun, especially when it came to platforms and SDKs.

Times have changed. Selling is now conducted on a **human-to-human level**, emphasizing information parity and shifting the focus from a seller's advantage to clarity—the right message is salient, focused, empathetic, and minimal.

As a result, the relationships we build are less transactional and more **beneficial**.

Conversations are less about persuasion and more about **balance**. We seek **partners**, not just customers.

Opportunities

and emotion.

Strategic Questions for Rebranding

20 min.

What is the most important single thing that MapsPeople should be associated with?

Jakub Ottomars

After this transition, what should remain the same with your business? What should remain constant about what we do?

Jakub Ottomars

Imagine that one has passed from this moment and when you look back, what factors do you consider to determine the success of the rebranding?

Jakub Ottomars

Rhetorical Triangle

The Rhetorical Triangle offers 3 pillars, of which utilizing at least 2 helps build trust with the audience. The model is proven, undoubtedly, since Aristotle introduced it to the world more than 2300 years ago.

We gradually associate ideas, thoughts, and concepts with each pillar.

15 min.

Brand Personality

Our brand has a personality, and if it seems otherwise, it may just be conservative and minimalist, or perhaps so intertwined with our identity that we overlook its individual character.

The goal of the exercise is to define who we are based on fundamental pairs of traits – and to exclude who we are not.

15 min.

Maskulinna	👍	Femininna
Jednoduchá	👍	Sofistikovaná
Konzervatívna	👍	Extravagantná
Pristupná	👍	Autoritatívna
Inkuzívna	👍	Exkluzívna
Zábavná	👍	Vážna
Profesionálna	👍	Uvoľnená
Moderná	👍	Klasická
Mladá	👍	Vyzrelá
Prirodná	👍	Technická

Market

"Think big but always remember to make the places where people are to be, small." — Jan Gehl

10 min.

Why stakeholders should choose/are choosing you over competitors?

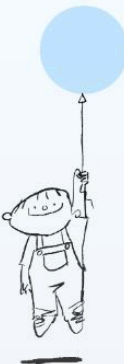

Jakub Ottomars

End-users

"Think big but always remember to make the places where people are to be, small." — Jan Gehl

10 min.

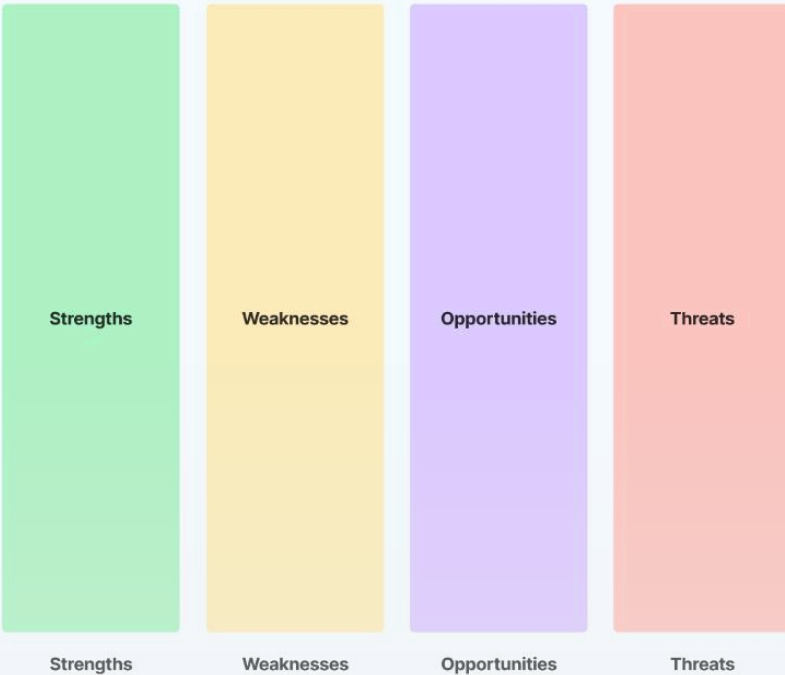

What they have in common?

Good old SWOT

When it comes to your brand—not the product—in comparison with the competitors, what do you consider to be our strengths, weaknesses, opportunities, and threats?

10 min.

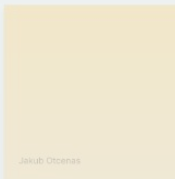

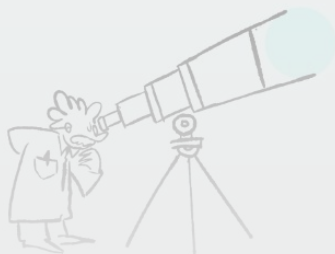

Values

Based on the previous exercises, let's summarize the values.

What values do we adhere to that are important to us? What do we disdain, or what does not align with our character?

10 min.

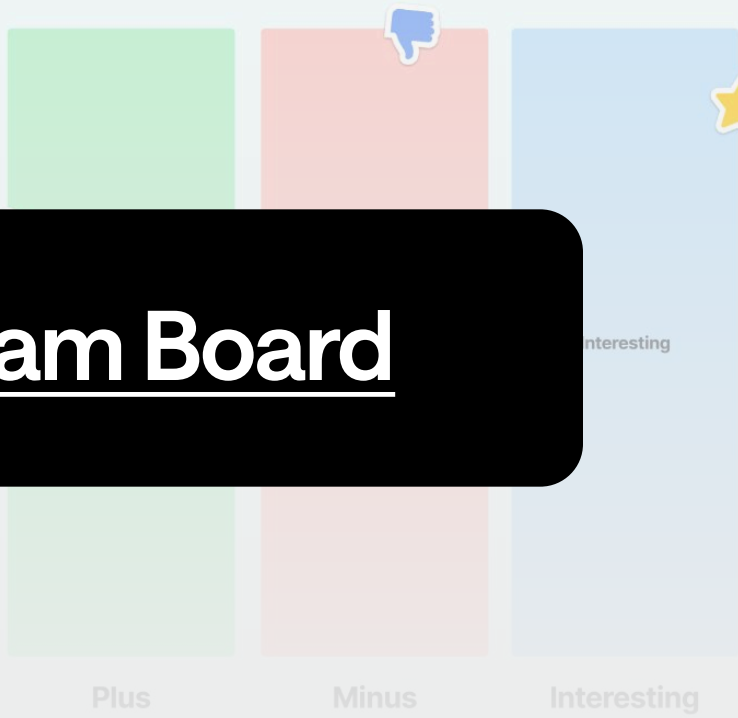

Plus/Minus/Interesting

The PMI method (Plus, Minus, Interesting) helps us quickly identify what makes us interesting, our strengths, and also highlights any weaknesses. It aids in aligning our thoughts based on

5 min. + 10 min.

FigJam Board

Priority Matrix

The Priority Matrix helps us determine which communication activities make the most sense for us and which ones we should not focus on. At least not right now.

10 min.

Thank You
